Fields of Interest
Ancient World

Biography
Ph.D. University of Washington, 2015

My research explores domestic hierarchies in Roman households and how those were expressed through daily routines. I am particularly interested in everyday practices that are associated with the somatic needs of the body and the objects that were used to assist these quotidian activities. Additionally, I am also interested in slavery and sexuality in the ancient world. I explore how those overlapped in specific instances in an effort to understand some of the daily conditions slaves faced while living in the Roman world.
